Re: Deployment of 911 in Unserved Areas - First Transition Report

The purpose of this letter is to report, in accordance with the Commission's directives,<sup>1</sup> on the status of 911 deployment in areas served by the Sprint local telephone companies (Sprint) where 911 is currently unavailable. Sprint has identified all of the unserved areas and has been communicating with county officials in those areas. The attached matrix provides a listing of the counties in Sprint serving territories where 911 service is not available, along with the status of progress for each area. At this point, Sprint has not encountered any problems or opposition to the requirement to provision 911 in these areas. If you have any questions or require additional information, please contact me.

Sincerely,  
/s/  
Pete Sywenki
